

DIVYANSH VERMA

Ghaziabad, Uttar Pradesh, India • +91 7302186628 • dvofficial72@gmail.com • linkedin.com/in/divyansh-verma-045602274

EDUCATION

KIET Group of Institutions

Bachelor of Technology (B.Tech) in Computer Science & Engineering (AI & ML) | **8.5 CGPA** (Through 2nd Year)

Focus areas: Data Structures & Algorithms (DSA), Machine Learning, Cloud Architecture, Full-Stack Workflows.

Ghaziabad, India

2024 – 2028

Maples Academy (PCM)

Intermediate (Class 12th) : **92%** • High School (Class 10th): **97%**

Deoband, India

Passed 2023

TECHNICAL SKILLS

Languages: Python, C++, Dart, C, HTML5, CSS3.

Machine Learning & Data Science: TensorFlow, Keras, Scikit-Learn, Pandas, NumPy, Predictive Modeling.

Cloud & Data Engineering: Amazon Web Services (AWS), AWS Glue, Amazon Kinesis, AWS Lambda, Amazon S3, Amazon Redshift.

Frameworks & Web Technologies: Flutter, Django, Three.js, Unity Engine.

Tools & Workflows: Git, GitHub, Linux/Ubuntu, VS Code, PyCharm, Object-Oriented Programming (OOP).

EXPERIENCE

GirlScript Summer of Code (GSSoC '26)

Open Source Contributor

Remote

May 2026 – Present

- Collaborating within decentralized engineering teams to solve bugs and scale features for large open-source codebases.
- Implementing feature updates and architecture patches across cross-platform frameworks including Django and Flutter.
- Utilizing advanced Git operations and branch management strategies to execute clean, production-grade Pull Requests.
- Engaging in collaborative testing, peer reviews, and code-standard compliance with Project Admins prior to branch merges.

InternPe

Artificial Intelligence & Machine Learning Intern

Remote

Jun 2025 – Jul 2025

- Engineered and deployed 4 end-to-end ML pipelines covering healthcare diagnostics, predictive analytics, and pricing.
- Built a Diabetes Prediction Model using Logistic Regression on PIMA dataset; attained 90% classification accuracy via robust feature preprocessing.
- Constructed Car Price Predictor using OneHotEncoder and iterative optimization over 1,000+ variants to maximize R^2 scores.
- Developed IPL Score Prediction System evaluating Linear, Ridge, Lasso, and Random Forest Regressors using Matplotlib/Seaborn.
- Modeled Breast Cancer Classifier using Deep Learning with TensorFlow/Keras; optimized hyperparameters and serialized via Pickle.

NOTABLE PROJECTS

Meteor Madness – NASA Space Apps Challenge 2025

Python, Data Processing

- Architected a data-driven space science simulation platform with cross-functional team members.
- Competed against regional cohorts to place within the **Top 15 out of 35 competing teams** in the region.

Riva AI Chatbot Integration

Python, Computer Vision

- Co-developed a student AI assistant featuring automated face recognition and dynamic Q&A response engines.
- Successfully demonstrated live multi-modal capabilities during official institutional club inaugurations.

CERTIFICATIONS

- **AWS Certified Data Engineering – Associate (DEA-C01):** Covers AWS Glue, Kinesis, Lambda pipelines, and IAM governance.
- **AWS Certified Cloud Practitioner (CLF-C02):** Covers foundational cloud architecture, cloud security, and cost-optimization.

LEADERSHIP & EXTRACURRICULARS

NextGen Supercomputing Club @ KIET

Treasurer

Ghaziabad, India

Nov 2025 – Present

- Formulating fiscal strategies, operational budgets, and resource metrics for student research initiatives.
- Directing operational funds toward computational frameworks using campus hardware, including the **NVIDIA DGX A100**.
- Collaborating across engineering teams to support HPC environments running Generative AI and deep learning models.

Innogeeks

Core Member – AR/VR Spatial Domain

Ghaziabad, India

Oct 2024 – Present

- Designing photorealistic 3D terrains and spatial interaction interfaces inside the Unity Engine using C# scripts.
- Implementing dynamic lighting, procedural asset layouts, and custom physics simulation environments.
